

WHERE LEGACY
MEETS INNOVATION

CERAM-A-STAR® 1050 SELECT SILICONE MODIFIED POLYESTER (SMP) COIL COATING SYSTEM

CERAM-A-STAR® 1050 SMP System is formulated to deliver superior color stability, chalk and fade resistance, and gloss retention. Designed exclusively for the metal construction industry, CERAM-A-STAR®'s excellent scratch and abrasion resistance provides surface protection during transit, handling, and fabrication. The combination of durability, toughness, flexibility and color retention makes CERAM-A-STAR® 1050 an excellent choice for residential, agricultural, and commercial applications.

Flack Global Metals is proud to offer CERAM-A-STAR® 1050 SELECT an optimized color palette offering the added protection of a Limited Lifetime Transferable Warranty* supported with AkzoNobel's No Coastal Setbacks program.
